New Zealand produces the finest pasture-fed lamb in the world. Raised on grass in their free-range natural environment New Zealand lamb is rich in protein, B vitamins, zinc and iron.

The carbohydrate content of most grains (like corn or rice) causes blood sugar to surge and fluctuate. Different from other grains, OATS are low-glycemic which means they trickle glucose into the blood, keeping energy levels balanced. Contract grown for Champion Petfoods in Northern Alberta, Canada, ACANA's steel-cut oats are a healthy low-allergen grain that helps balance blood sugar.

Harvested from the Okanagan Valley in British Columbia, our Red Delicious apples provide a source of healthy fiber to aid digestion and are rich in phytonutrients—natural antioxidants that help protect cells from free radical damage within the body.
